Forecast for Sunday 04 Apr 2021

Weather: Clear skies through the early hours. Some areas of hill fog are likely to develop across western hills around dawn, but a sunny start is probable in the east. Any cloud will lift and break through morning to leave a dry, often sunny day. Cloudier through evening as a band of patchy rain sinks southwards.

Chance of cloud free mountain/hill tops above 700m: 30% west through morning otherwise 90%. Falling 40% after dark.

Visibility: Areas of hill fog above around 400m across the west during morning will lift above summits to leave very good visibility. Some hill fog returning to summits through evening.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Be aware of gales developing on summits through evening.

Forecast for Monday 05 Apr 2021

Weather: A change to significantly colder conditions with bitterly cold winds and a few well scattered snow showers, these wintry at all levels. Plenty of sunshine between these showers but this doing little to offset the cold temperatures.

Maximum wind: North or northwest 25-30 gusting up to 45mph.

Chance of cloud free mountain/hill tops above 700m: 70%.

Visibility: Passing snow showers may reduce visibility to a few hundred metres and bring areas of cloud down to around 300-400m. Away from these, visibility will be excellent.

Temperature: **Valleys:** Minus 1 or 2C rising to 2 or 3C.
At 700m: Minus 3 to minus 5C.
Freezing level: 200m or below.
